DIGITAL SAFETY

Presentation on

SPY APPS AS A CASE STUDY

TECHSECURITY

March 29, 2026

WHAT IS SPY APP

- The spy app (spyware) is a malicious software installed on devices (like PHONES AND PCs) to secretly monitor the activities and collect data from the user.

WHAT DOES SPY APPS DO?

- ❑ **Track Location**
- ❑ **Read Your Messages**
- ❑ **Inspect Browsing History**
- ❑ **Listen To Calls and Record**

HOW DO THEY GET TO THE PHONE

- Installed Manually By Someone with Physical Access To The Device (Phone or PC)

- Hidden In Malicious Apps Or Attachments Or URL (Link)

Messages containing fake url

Example of genuine websites
